

# Nutrition Policy Development

## Identifying Nutrition Priorities

What foods do you want to prioritize purchasing?

What foods do you want to stop purchasing or purchase less of?

What foods do you want to seek out in donations?

What foods do you want to limit or refuse in donations?

Are there special considerations you want to call out for Power Packs, No Cook Bags or other programs?

## Broader Priorities

Are there other areas where you want to bolster the effectiveness of your nutrition policy by supporting your shoppers' health?

Some of these may overlap with the priorities you have already listed. Use the table to jot down any notes or specific ideas on how these areas could support your agency's priorities around nutrition.

		Notes, Ideas, Next Steps
<input type="checkbox"/>	<b>Behavioral economics</b> (e.g., product placement, priming, signage)	
<input type="checkbox"/>	<b>Procurement sources</b> (e.g., partnering with farms)	
<input type="checkbox"/>	<b>Donor education</b> (e.g., sharing information about the importance of healthy food donations)	
<input type="checkbox"/>	<b>Nutrition information</b> (e.g., highlighting/labeling healthy foods, posting key nutrient information about foods)	
<input type="checkbox"/>	<b>Nutrition education</b> (e.g., sharing information about key elements of a healthy diet)	

<input type="checkbox"/>	<b>Food demonstrations and taste testing</b> (e.g., offering samples of healthy foods and dishes)	
<input type="checkbox"/>	<b>Food assistance referrals</b> (e.g., promoting enrollment in WIC and SNAP, sharing information about nutrition incentive programs)	
<input type="checkbox"/>	<b>Dietary accommodations</b> (e.g., offering foods that meet dietary needs based on culture and medical need)	
<input type="checkbox"/>	<b>Shopper choice</b> (e.g., reducing limits on healthy foods, using a “choice” or “shopping model”)	
<input type="checkbox"/>	<b>Volunteer training/engagement</b> (e.g., fostering service opportunities and communication styles that respect the dignity of clients)	
<input type="checkbox"/>	<b>Other</b>
